I am a hardworking and self-motivated Flutter developer with 1 year of experience. I am passionate about tackling challenges in a demanding work environment and excel in prioritizing workloads to enhance organizational efficiency. As a proactive thinker and keen learner, I have taught myself Flutter and Dart, developing a strong foundation in mobile app development. My commitment to continuous learning and improvement drives me to deliver high-quality results.

Work Experience

Intern Flutter Developer

Present

Luminar TechnoHub, Kakkanad

- Development and Implementation: Assist in developing and implementing mobile applications using Flutter, ensuring the creation of robust and scalable code.
- Collaboration: Collaborate closely with senior developers, designers, and team members to understand requirements and contribute to technical solutions.
- Testing and Debugging: Engage in testing and debugging processes to verify the quality and functionality of applications across different devices and platforms.
- Learning and Development: Continuously learn and apply new Flutter features and best practices, keeping abreast of the latest trends in mobile app development.
- Documentation: Help maintain detailed documentation of code, processes, and project requirements to support effective team collaboration and project tracking.

Stock Manager

Feb 2021 - Dec 2023

B.MK.GROUP

- Managed and maintained accurate inventory records to ensure optimal stock levels.
- Coordinated with suppliers to reorder products, preventing stockouts and overstocking.
- Organized warehouse storage to maximize space efficiency and product accessibility.
- Conducted quality control inspections on incoming stock, addressing any discrepancies with suppliers.
- Monitored and controlled inventory costs to minimize waste and improve profitability.

Technical Supporter

Oct 2020 - Jan 2021

Abasoft Technologies | Ernakulam

- Address and resolve customer complaints and issues effectively.
- Escalate complex problems to higher-level support when necessary.
- Assist customers with account setup, updates, and management.
- Verify and update customer information as needed.
- Analyze customer issues and provide effective solutions.
- Use critical thinking to troubleshoot and resolve problems.

Projects

Car Rental APP

The Car Rental App simplifies booking and managing car rentals with features like user authentication, real-time availability, secure payments, and GPS tracking. Users can browse cars, make reservations, view rental history, and access customer

support, providing a seamless and efficient experience for both renters and rental agencies.

News App Using Api

NewsApp is a user-friendly mobile application that aggregates the latest news articles from various sources through API integration. It features a clean interface, customizable news categories, and real-time updates. Users can bookmark articles, share news, and receive notifications on trending topics, ensuring they stay informed and engaged.

Expense Tracker APP

Expense Tracker is a mobile app designed to help users manage their finances efficiently. It allows users to log expenses, categorize transactions, set budgets, and generate detailed financial reports. With features like expense tracking, budget alerts, and data visualization, users can gain insights into their spending habits and achieve their financial goals.

ToDo APP

ToDoApp is a productivity-focused mobile application designed to help users manage tasks efficiently. It features task creation, editing, and organization with priority settings and reminders. Users can categorize tasks, set deadlines, and track progress, ensuring a streamlined approach to task management and improved productivity.

Note APP

NoteApp is a versatile mobile application designed for creating, editing, and organizing notes. It features text formatting, tagging, and categorization, allowing users to efficiently manage their notes. With additional functionalities like search, reminders, and cloud synchronization, NoteApp ensures that users can access and organize their notes seamlessly across devices.

Amazon Prime Video Clone UI

The Amazon Prime UI Clone is a mobile application that replicates the user interface of Amazon Prime with pixel-perfect accuracy. It includes features such as smooth navigation, content browsing, and media playback, providing a visually similar experience to the original app. This clone demonstrates proficiency in UI design and implementation using Flutter.

Instagram Clone

The Instagram Clone is a mobile application that mimics the core functionalities of Instagram, including user authentication, image uploads, and real-time updates. It features a feed for viewing posts, profile management, and interactive elements such as likes and comments, offering a similar user experience to the original app.

Core Skills

Flutter, Dart, UI Design, API Intergration, State Management, Git, Firebase, Problem Solving, Good Leadership, Good Communication Skill, C++, App Deployment, UI Design
