SUMMARY

I am a hardworking and self-motivated Flutter developer with a passion for taking on the challenges of a demanding work environment. As a proactive thinker and keen learner, I excel in prioritizing workloads and contributing to the efficiency of the organization. Having taught myself Flutter and the Dart programming language, I have honed my skills and developed a strong foundation in mobile app development. My commitment to continuous learning and improvement drives me to deliver high-quality results.

WORK HISTORY

Luminar TechnoHub | Ernakulam

 Internship   Present -

B.MK.GROUP | Kattappana

Stock Manager   Feb 2021 to Dec 2023

- Managed and maintained accurate inventory records to ensure optimal stock levels.
- Coordinated with suppliers to reorder products, preventing stockouts and overstocking.
- Organized warehouse storage to maximize space efficiency and product accessibility.
- Conducted quality control inspections on incoming stock, addressing any discrepancies with suppliers.
- Monitored and controlled inventory costs to minimize waste and improve profitability.
- Supervised and trained warehouse staff, ensuring adherence to safety protocols and efficient operations.
- Utilized inventory management software to keep records up-to-date and streamline stock management.
- Resolved stock-related issues raised by sales or customer service teams to ensure customer satisfaction.

Abasoft Technologies | Ernakulam

Technical Supporter   october 2020 - January 2020

- Address and resolve customer complaints and issues effectively.
- Escalate complex problems to higher-level support when necessary.

- **Assist customers with account setup, updates, and management.**
- **Verify and update customer information as needed.**
- **Analyze customer issues and provide effective solutions.**
- **Use critical thinking to troubleshoot and resolve problems.**

EDUCATION

Luminat TechnoLab | Ernakulam

Flutter Developer   January to May 2024

Holy Cross College Of Management And Technology | Puttady,Idukki,Kerala

 Bachelor Of Computer Application   2017-2020

Ossanam E.M.H.S.S,Kattapana, Kerala

 Higher Secondary   2017

PROJECTS

CAR RENTAL APP USING FLUTTER :- The Car Rental App (ENIOUKIO) developed with Flutter and Firebase offers users a seamless and convenient platform to rent vehicles. Flutter's cross-platform capabilities ensure a consistent user experience across various devices, while Firebase provides a reliable backend infrastructure.Key features of the app include a user-friendly interface for browsing available vehicles, secure authentication for user accounts, real-time updates on vehicle availability through Firebase's database, and integration with payment gateways for seamless transactions. Users also receive timely notifications regarding booking confirmations and updates on their reservations.Administrators benefit from an intuitive admin panel to manage vehicle listings, track bookings, and monitor user activity efficiently. The app encourages user feedback and reviews, contributing to service quality improvement..

QUIZ APP USING FLUTTER :- In this endeavor, a quiz application was created utilizing Flutter, renowned for its capacity to build natively compiled apps across mobile, web, and desktop platforms from a singular codebase. The app showcases an array of quizzes featuring multiple-choice questions, enabling users to test their knowledge across various topics. Key functionalities include user authentication, customizable quiz categories, time-limited questions, instant feedback on answers, and score tracking. Leveraging Flutter enhances user engagement with modern UI elements and responsive design. Backend integration was implemented to manage user data, quiz content, and scores, ensuring scalability and user-friendliness for learning and entertainment.

TODO APP USING FLUTTER :- The objective of this project was to develop a to-do application utilizing Flutter, tailored for crafting natively compiled apps across mobile, web, and desktop platforms from a singular codebase. The app empowers users to efficiently organize tasks, featuring capabilities such as task creation, editing, deletion, categorization, and prioritization. Additional functionalities include setting reminders, due dates, and marking tasks as complete. Flutter's responsive design capabilities facilitated the creation of a clean and intuitive user interface. Data synchronization across devices was achieved through backend services,

ensuring seamless accessibility to tasks anywhere, anytime. This project demonstrates the effective use of Flutter in creating a reliable and visually appealing productivity tool.

NEWS APP USING FLUTTER :- This project involved the development of a news application leveraging Flutter, a versatile framework enabling the creation of natively compiled apps for mobile, web, and desktop platforms from a singular codebase. The app delivers up-to-date news articles across various categories, including politics, sports, technology, entertainment, and more. Key features comprise personalized news feeds, article bookmarking, push notifications for breaking news, and offline reading capabilities. Flutter's responsive design guarantees a smooth and immersive user experience, characterized by seamless navigation and superior performance. Integration with news APIs facilitates real-time data retrieval, while a backend system manages user preferences and interactions, rendering it a comprehensive and scalable solution for news content delivery.

AMAZON PRIME VIDEOS CLONE USING FLUTTER :- The Flutter clone project for Amazon Prime Videos aims to replicate the core features and functionalities of the original platform using the Flutter framework for cross-platform development. It involves creating a user-friendly interface with tabs for browsing various content categories like movies, TV shows, and originals. The app will offer a vast catalog of titles, personalized recommendations, and features such as offline viewing, subscription management, and social sharing. By leveraging Flutter's capabilities, the project aims to deliver a seamless streaming experience to users on both iOS and Android devices.

SKILLS

Flutter, Dart, UI Design, API Intergration, State Management, Git, Firebase, Problem Solving, Good Leadership, Good Communication Skill
